🎧 Sriranjjan Kapilan

## Profile

---

A highly skilled developer with extensive experience in the MERN stack and back-end development using Spring Boot. I excel in creating high-performance, scalable software solutions that address complex business needs. With a proactive approach, strong commitment to excellence, and a passion for continuous learning, I consistently deliver innovative and effective solutions, exceeding project expectations.

## Education

---

2019 – 2023

**B.Sc(Hons) in Computer Science and Technology**

*Uva Wellassa University of Sri Lanka*

## Professional Experience

---

2023/10 – present

**CodeLantic Pvt Ltd**

*Associate Software Engineer*

### **Business Operations Platform**

- Web-based platform for retail management, integrating finance, compliance and user management.
- Implemented features like shift management, employee management, payroll, income/expense tracking and stock management.
- Technologies - Java 17, Spring Boot, Microservices Architecture, MySQL, Spring Data JPA, Spring Cloud Gateway, Jaspersoft studio.

### **Real Estate Management Platform**

- Developed a web-based real estate platform for buying, selling, leasing, and renting properties, with two-factor authentication, KPI dashboards, and property management tools.
- Enabled property search, loan comparisons, payment calculations, and newsletter subscriptions for enhanced user experience.
- Added features for agent searches, FAQs, report generation, and downloads to improve collaboration and decision-making in the real estate market.
- Technologies - Java 17, Spring Boot, Microservices Architecture, MySQL, MongoDB, Spring Data JPA, Spring Cloud Gateway

2023/03 – 2023/09

**CodeLantic Pvt Ltd**

*Software Engineer - Trainee*

### **Currency Exchange Platform (Fintech Domain)**

- Developed a currency exchange platform for customers and administrators. Users can buy/sell currencies, manage deals, and track transactions. Admins monitor activities, manage users, adjust rates, and generate reports, with secure two-factor authentication (2FA) for enhanced protection.
- Technologies - Java 8, Spring Boot, Hibernate, Microservices Architecture, MySQL, API Gateway, Flyway migration & triggers
